Erectile dysfunction: Ontario and Toronto resources

Coverage, navigation and product-safety prompts

General health information only. This page does not diagnose a condition or replace an assessment by a qualified clinician.

Version 1.0 · Publication date: 20 November 2026 · Clinically reviewed by Dr. Eduardo Jacques

Urgent and medication safety

Immediate danger: call 911. A painful erection that persists or lasts 4 hours or more is an emergency. Sildenafil, tadalafil and vardenafil should not be used with nitrate medicines or recreational “poppers.”

Ontario navigation

Health811 — call 811 for confidential advice and care navigation. **Ontario OHIP information** — medically necessary physician and hospital services may be insured, but exact service rules matter. **Medication coverage** — ODB, OHIP+, Trillium, Exceptional Access and private plans depend on eligibility and the product. **Health Canada** — check that a sexual-enhancement product is authorized and use prescription products only under health-professional supervision.

Coverage prompts

Urology, sexual-health, counselling, pelvic-floor physiotherapy, devices and other allied services may be publicly funded, program-dependent, privately insured or privately paid. Confirm fees, referral requirements and eligibility directly.
